Diagnostics 4.0 – by Softing Automotive

Remote Diagnostics becomes Diagnostics 4.0 - Softing definition

Conducting diagnostics on ECU(s) in remote systems providing Internet access by telematics services; using state-of-the-art, cloud-based technologies and security mechanisms enables a holistic approach in terms of data capturing and analysis, also with respect to data processes.

Remote Diagnostics

Sending and receiving comprehensive ECU data between the application and the vehicle via a long distance 1:1 connection.

Test & Verification

Cloud Diagnostics

Gathering and transmitting ECU data worldwide via an autonomously run cloud application using preconfigured campaigns from and to a defined fleet of vehicles.
